BBS CARP HOOKS  
THE EASIEST D-RIG SYSTEM  
EVER CONSTRUCTED

Premium-quality carp hooks with solid welded pre-made D-rig loop. Easy to use, no sliding knots and it gives the perfect presentation of your bait. Ultrapoint 4.8 point technology. All hooks are coated with Mustad's new matt gray titanX giving an exceptional strong and none flashy finish. At the same an ultra smooth hook for easy penetration.

The manufacturing technic for these hooks did not exist before Mustad had new machines designed and made. Mustad has it's own factory which now as the only in the world the can offer Ultrapoint 4.8 technology, TitanX coating and the laser welding which is used the manufacture the D on the BBS hooks. It's a long process to create a BBS hook, in fact all hooks go through 12 work stations. Every single hook is assembled by hand before being laser welded in Mustad's one of a kind machine. Nobody else has these hooks qualities, nobody has the technology to make them!

The MUline is a none compromise premium-grade copolymer designed to give anglers top-performing carp line. It says itself it has ultra-high abrasion resistance and superb knot strength. We have managed to create a silky smooth finish that makes casting and tying knots a pleasure. But unique to this line is the Dual Tone Light Syntheses Camo which is unique to Mustad! This line color changes after how the light hits it from natural green to brown tones. This makes the line adapt perfectly into its natural environments giving a great advantage when chasing those older experienced and often huge carp.
